

**Options for Bank Verification**

(Note: The information below cannot be used to access the money in your bank account, your social security number, birthdate, or any other personal information outside of what’s listed. It is only an official bank duplicate to verify banking and routing numbers.)

**1. Picture or scan of a voided check.**

**2. Screenshot or printout your banking and routing information from you bank portal. (Typically, you can access this by clicking on your account name (for example: “Total Checking...last 4 numbers”) above your balance.)**

**3. Request an ACH Form from your bank through the online portal, in-person, or by phone.**
